The Fall 2015 enrollment increased minimally by less than 1% over Fall 2014. If TAMUG historical enrollment patterns remain, fall 2016 enrollment should have a significant increase, especially with new stall and a concerted effort at enrollment expansion. The slight enrollment increase also brought about a minor increase in total credit hours.

Full-Time Equivalent Enrollment

2. Fall semester credit hours (SCH) includes undergraduate(15), master's(12), doctoral(9), special-professional(12), and optometry(17). 

	Fall 2000	Fall 2014	Fall 2015	% Change Fall 2000 to Fall 2015
<b>Total FTSEs</b>	<b>1,291</b>	<b>2,103</b>	<b>2,128</b>	<b>64.8%</b>
<b>State-Funded FTSEs</b>	<b>1,280</b>	<b>2,050</b>	<b>2,060</b>	<b>61.0%</b>

NOTE: The percentage change is based on the actual FTE numbers and may vary slightly from the calculation produced by the rounded numbers. Post-baccalaureate students are counted separately from master's for headcount enrollment and are counted with master's for FTE enrollment calculations.

With a minimal increase in enrollment, overall FTSE also increased slightly by 25 FTSE. TAMUG historical patterns and new enrollment staff should reflect further enrollment and FTSE increase for fall 2016.

**Participation - Out-of-State Peers**

Out-of-state peer data is from the Fall 2014 IPEDS report and may not match accountability data because of differences in the source of the data. Accountability measures are primarily derived from institutional data sent to the CB for CBM reports. Data reported on this out-of-state peer link is obtained from the IPEDS system of institutional reporting to the federal government. Data differences may result from different reporting periods and different definitions for the data elements.

Persistence and graduation are key concerns for the Galveston campus. As a special purpose institution, a student who may pursue a different major often chooses to leave Galveston. Although this measure does include other Texas institutions, it may not accurately reflect approximately 13% of the incoming freshman that are non-residents.

The number of degrees awarded for 2014-2015 increased to 411 from last year at 353. The continued increase in enrollment will translate to increased graduation numbers over the next few years. Of significance, due to the type of degrees offered (marine and maritime industry), TAMUG degrees require a minimum of 120 semester credit hours to a maximum of 151. We hope our emphasis on transfer students will impact degree production.

Overall, graduation and persistence rates have decreased slightly. Although this measure does include persistence to other Texas institutions, it may not accurately reflect approximately 13% of the incoming freshman that are non-residents. Additionally, we have a number of students who start their program at Galveston but pursue their majors at the main campus.

The data for this accountability measure is tracked for one year for students who met TSI and for one, two, and three years for students who did not meet TSI for this report.

\*The Unknown (unduplicated) category does not include students who are unknown in some areas and not met in others.

\*\*Unknowns by area include students with waivers or exemptions who have not been reported as meeting TSI on a performance measure; FTIC students with waivers or military exemptions who were reported as meeting TSI in all areas based on performance measures are included in the "met state standards in all areas" category.

23. Underprepared students who satisfied TSI obligation within 2 years.

TAMUG provides a unique service to the State of Texas in the marine and maritime industries. Our non-resident population has varied from 17% to 26% of the total student body. While many will choose to reside in Texas, graduates are often sought along the Gulf Coast, nationally, and internationally.

TAMUG will continue to strive for a high ratio of undergraduate FTSE to degrees awarded. Within the context of our special purpose mission, although reflecting a slight increase the Fall 2015 enrollment provides encouragement that we will increase number of degrees issued over the next two to three years as occurred this year.

**Faculty Teaching**

	Fall 2000	Fall 2013	Fall 2014	Point Change Fall 2000 to Fall 2014
33. Tenured/tenure-track faculty teaching lower-division SCH 	29.9%	31.4%	26.5%	- 3.4

Strong efforts have been made to ensure high quality education especially at the lower levels where incoming students can experience difficult transition issues. On the TAMUG campus, tenure reflects a high level of commitment and quality of research. Tenure may not be an effective proxy for quality teaching and learning. Full-time faculty members with terminal degrees in their disciplines and excellent teaching records are not included in this measure. Faculty members teaching in the maritime program are not considered for tenure. No graduate teaching assistants teach academic courses (although they may teach laboratory sections).

**Student/Faculty Ratio**

**34. Full-time student equivalents (FTSE) divided by full-time equivalent (FTE) faculty.** 

	Fall 2000			Fall 2013			Fall 2014			% Change Fall 2000 to Fall 2014
	FTSE	FTE	Ratio	FTSE	FTE	Ratio	FTSE	FTE	Ratio	
FTSE/FTE Ratio	1,291	70	19:1	1,988	104	19:1	2,103	107	20:1	5.9%

With recent budget reductions, every effort was made to reduce administrative costs and not harm the teaching and learning environment. However, if our enrollment continues to grow and resources decline, the student/faculty ratio will be impacted. Despite the reductions, our faculty to student ratio provides for excellent learning opportunities.

On the TAMUG campus, tenure reflects a high level of commitment and quality of research. Tenure may not be an effective proxy for quality teaching and learning. Faculty members teaching in the maritime program in both transportation and engineering are not considered for tenure.

**Quality Enhancement Plan**

**37. Quality Enhancement Plan, Including Reaffirmation Year** 

TAMUG as a branch campus of TAMU has developed a QEP and did very well during our 2013 SACSCOC visit. The QEP and can be review by visiting the following link:

**Excellent Programs**

**38. Excellent Programs** 

**Highlighted Excellent Programs 1**

Texas A&M University at Galveston's Waterfront is an energetic hub of activity. The campus community uses a unique mix of education, training, and recreational vessels, which are available seven days a week. The waterfront hosts numerous waterborne research projects, labs, training opportunities, continuing education programs, and Sea Camps. The W.A.V.E. Living Learning Community is an exclusive mix of talented freshmen. Community members from across all majors will live together and attend regularly scheduled activities associated with the navigation, operation and maintenance of the university's small vessels. At the conclusion of this one year program all members will become certified small vessel operators. This program will challenge three crews of six people in a mix of activities designed to give the participants hands-on knowledge of small vessels, teamwork, life skills and academic development. The W.A.V.E. Community

is supported by the Waterfront Operations Department with maintenance facilities, docks, boats, and administrative spaces for students and their families, former students, faculty, staff, the TAMU system, and the Galveston community.

**Highlighted Excellent Programs 2**

Texas A&M University at Galveston developed two living learning communities to augment classroom education. Waterborne Activities and Vessel Experience (WAVE) centered on boating. In its first year, the program challenged three crews of six people in activities designed to provide hands-on knowledge of small vessels and the Galveston Maritime Community. In year two, 16 freshmen and 12 returning students met weekly to learn how to operate various vessels, and the rules of operating watercraft to become certified small boat operators, with returning students in a leadership/mentoring role. The experience provided hands on active instruction to students pursuing marine related careers. Another Living learning community established was LEAD LLC, which focused on personal leadership. Ten students participating in this activity met formally every week to assess their personal leadership, assess how that leadership impacted others, eventually working together to take on a campus-wide leadership program addressing world hunger. These students will use their interpersonal, networking, and leadership skills they have developed to accomplish a broad variety of projects.

TAMUG is ranked high in expenditures per tenure/tenure track faculty in the State. Since Fall 2003, university resources have been dedicated to replace aging equipment and increase research capabilities. Especially in a coastal environment that decreases the life expectancy of equipment by nearly half, future funds are needed to replace and maintain research equipment if this measure is to improve. Some fluctuation in research funding is expected due gaps between completion of multi-year projects and start of new grants and to our aging faculty. Current retiring faculty are being replaced by new assistant professors.

**Institutional Efficiency and Effectiveness - Key Measures****Administrative Cost**

	FY 2000	FY 2014	FY 2015	Point Change FY 2000 to FY 2015
52. Administrative costs as a percent of operating budget 	14.0%	13.7%	12.6%	- 1.4

Cost increases from last year are primarily associated with the closing of several Construction projects 3.3m; along with Restricted fund increases as more research projects came on board and others were closed 2.7m and finally an increase in the costs associated with Auxiliary Enterprises 200k. The size of this campus does not allow for the economy of scale needed to meet the 10.5% Institutional Support expense goal at this time; as we continue to grow this number will continue to fluctuate and go down.

**Space Usage Efficiency (SUE)**

53. Space usage efficiency measure of the effectiveness and efficiency of existing teaching space utilization. Classroom and lab passing score is 75 and overall passing score is 150.

	Fall 2014	Fall 2015
Classroom space use efficiency	76	76
Lab space use efficiency	92	92
Overall space use efficiency	168	168

Texas A&M University at Galveston is committed to good stewardship of resources, the consistent scores for lab and classroom utilization is indicative of this commitment. The opening of the housing and classroom complex in the spring of 2016 will add much needed space.

**Appropriated Funds per FTE Faculty**

54. State appropriations divided by full-time equivalent students and annual full-time equivalent teaching faculty.

Appropriated funds per FTE faculty	\$77,807	\$83,664	\$79,851	2.6%

**Historically Underutilized Business (HUB)**

	FY 2000	FY 2014	FY 2015	%/Point Change FY 2000 to FY 2015
55. HUB Expenditures without construction (Millions) 	\$ 0.267	\$ 0.972	\$ 0.977	266.1%
Percent of total expenditures	4.6%	8.2%	7.3%	2.7
HUB Expenditures with construction (Millions)	\$ 0.279	\$ 1.699	\$ 1.065	281.5%
Percent of total expenditures	4.8%	14.4%	8.0%	3.2

HUB expenditures continue to increase slightly for those expenses outside of construction costs. This is a direct result of continued efforts from our departments to utilize HUB vendors. HUB expenditures for construction shows a marked decrease. This is directly related to only one construction project occurring during FY2015 and it was a P-3 project using outside vendors which did not employ as many HUB sub-contractors as the previous year. We will begin construction on two construction projects during FY2016 which we hope will improve these numbers.

A majority of TAMUG students major in either marine science or engineering. These disciplines tend to be more costly due to faculty costs, small classes, laboratory facilities and equipment needs. The coastal environment and the nature of marine fieldwork further increase these costs. The Texas A&M Maritime Academy and operation of the General Rudder pose unique funding issues such as dredging, fuel costs, staffing professional mariners, port fees, and cruise support services.

60. Percentage of undergraduate classes with 50 students or more 	11.4%	15.7%	16.1%	4.7

Maritime courses are often limited in size due to federal regulations. Hands-on training and small classes are a hallmark of high quality instruction in the maritime fields. Although some general education classes have been expanded for economic reasons, we have reduced class sizes in mathematics to promote student engagement and success.
