# Higher Education Accountability System

## Success - Out-of-State Peers

Out-of-state peer data is from the Fall 2014 IPEDS report and may not match accountability data because of differences in the source of the data. Accountability measures are primarily derived from institutional data sent to the CB for CBM reports. Data reported on this out-of-state peer link is obtained from the IPEDS system of institutional reporting to the federal government. Data differences may result from different reporting periods and different definitions for the data elements. Out-of-state peers may not be comparable for some metrics. Not all out-of-state peers for health-related institutions are stand-alone health-related institutions.
